

Tame Your Unpredictable Log Data Expenses

Gain control and maximize the value of every log with our SIEM-integrated platform

Are unpredictable log volumes and soaring storage costs making it difficult to justify the full value of your SIEM? **You're not alone.**

We provide intelligent log management that seamlessly integrates with your SIEM, helping you optimize data, control costs, and ensure your team has the right data to detect real threats—without the financial surprise.

4 Benefits That Power Your Operations

Reduce Total Log Management Costs by 50%-80% with smart data tiering and compression.

Achieve Predictable Spending with a platform designed for cost-efficiency at scale.

Enhance SIEM Performance by feeding it only the most critical, high-fidelity data.

Retain Compliance Data cost-effectively without impacting your security operations.

Ready to transform your log data from a cost center into a strategic asset? **Let us show you how.**
